“My people are my business, they simply must be paid accurately and on time”

JC Payroll Services is one of the UK's largest BACS approved bureaus. We process payrolls worth in excess of £250m every year.

Because we're BACS approved, we are regularly inspected and audited to demonstrate that our systems, security, IT, operations and processes are robust and effective. We are committed to and bound by BACS ethics, for your peace of mind.

The process, legislation and detail of payroll management is our core business but it's not yours. When you free yourself from the distracting burden of payroll administration you can get on with what you do best.

To deliver our service, we look at payroll from your point of view. We understand that you want a complete service with no hidden extra charges. You need a totally reliable payroll partner who understands all the relevant statutory legislation and works accurately and to schedule, so you don't have to worry about deadlines and details.

We believe that communication is vital - you want to be able to speak to an expert who understands your business whenever you have a query or need to make a change. All our clients have their own dedicated account handler, because we know that customer loyalty does not come from an from an impersonal, faceless service.

We provide a fully managed service at a transparent fixed fee, with no hidden costs or unexpected extras.
